ABOUT ME

Motivated and detail-oriented Machine Learning Engineer with a solid foundation in supervised learning, data preprocessing, and model evaluation. Gained practical experience through developing multiple end-to-end ML projects using real-world datasets. Currently advancing skills in deep learning, neural networks, and model deployment. Proficient in Python, Scikit-learn, Pandas, and data visualization tools. Committed to continuous learning and passionate about using data and AI to solve meaningful problems and deliver business value.

Participated in several programming competitions, enhancing problem-solving skills and collaborative innovation.

EDUCATION

Bachelor student

Computer Science department, Faculty of Computers and Artificial Intelligence, Fayoum University

[Oct 2022 – Current]

PROFESSIONAL SKILLS

- **Machine Learning & Deep Learning:** Regressions, Classifications, CNN
- **Model Optimization & Deployment:** hyperparameter tuning, Streamlit, Flask (Basic)
- **Data Analysis & Visualization:** EDA, Feature Engineering, Matplotlib, Seaborn, Plotly
- **Programming & Tools:** C++, Python, NumPy, Pandas, Scikit-learn, TensorFlow, Git
- **SQL & Data Handling:** Intermediate SQL, Data Preprocessing, Structured dataset management
- **Problem Solving & Adaptability:** Strong analytical skills, quick learner, solution-oriented
- **Teamwork & Communication:** Effective in collaborative environments, technical documentation

PROJECTS

- **Diabetes Prediction System – Machine Learning Project**

Developed and deployed a supervised machine learning system for diabetes prediction using 100,000+ real patient records, performing full data preprocessing (missing value handling, encoding, scaling), applying SMOTETomek for class balancing and GridSearchCV for tuning, and selecting Random Forest as the final model with 95.4% accuracy and strong recall performance, delivered via a Streamlit web application for real-time prediction.

COURSES & TRAINING

- **Practical Machine Learning for Data Scientists — Coursat.ai**
- **Machine Learning for Data Analysis — NTI (National Telecommunication Institute)**

120 hours – Scholarship Program [July 2025]

- **Python for Data Analysis — NTI (National Telecommunication Institute)**

72 hours – Scholarship Program [May 2025]

- **Intro to Data Science — Cisco Networking Academy [Apr 2025]**

CERTIFICATES & AWARDS

- **ECPC Egyptian Collegiate Programming Contest, Finalist – [2023 & 2024]**
- **Problem Solving (Basic) from HackerRank [sep 2024]**
- **Volunteered in FAO Model ASU [Jun 2023]**
